

AMR ANWAR HUSSAIN AHMED AL-ARKANI

amr@amr.engineer • +966 50 497 9812 • amr.engineer • github.com/amr-engineer

SUMMARY

Backend-leaning **software engineer** building **scalable web** platforms and **backend architecture**, with reliability focus and strong **UI/UX** awareness. Experienced with **Node.js**, **Go**, **PostgreSQL**, **MongoDB**, **Linux** and **AWS**.

EXPERIENCE

- Game Developer** – *Sarmad Studio*Hybrid | Jan 2025 - Present
 - Co-founded an indie game studio, directing technical architecture and **cross-platform** builds.
 - Shipped **Charlatan**, a social deduction game featuring **real-time voice** chat over **WebRTC** via **TURN**.
- Full-Stack Developer** – *Noor al Mashaer (Part-Time)*Makkah, SA | Apr 2025 - Jul 2025
 - Co-built a **Next.js** web app, replacing manual **Excel spreadsheets** with a **PostgreSQL** database-backed system.
 - Implemented **Role-Based Access Control (RBAC)** and internationalization (**i18n**) with responsive operator UI.
- Software Engineer** – *Smart TMBot*Remote | Jun 2021 - Sep 2024
 - Engineered **event-driven** automated **chat bots** for community management at monthly **280k+ user** scale.
 - Integrated third-party **REST APIs** with advanced workflows backed by **MongoDB** for reliable automation.
 - Deployed and operated services on **Google Cloud Platform Compute Engine (GCP)**.

PROJECTS

- clipdmenu** (*Clipboard Manager*)Released Aug 2026
 - Built a lightweight clipboard manager in **Rust** based on **client-server** architecture for **X11** on **Linux**.
 - Implemented text and image history with a **background monitoring**, **caching** and **realtime** serving.
- amr.engineer** (*Personal Website*)Released Dec 2025
 - Published a responsive professional website (**HTML**, **CSS**, **JavaScript**); attracted **25K+ visits** in month one.
 - Hosted on **AWS EC2** behind **nginx** then **Caddy**, migrated backend from **Node.js (Express.js)** to **Go**.
- mini-polkit** (*PolicyKit Authorization*)Released Jul 2025
 - Developed a minimal, security-focused **low-level authentication** agent in **C** for embedded **Linux** systems.

LANGUAGES

- Arabic** - Native speaker
- English** - Achived **94/100** in the Standard Test for English Proficiency (STEP)

TECHNICAL SKILLS

- Programming:** C, Rust, Python, JavaScript, TypeScript, SQL, Go
- DevOps:** Linux, Git, CI/CD, GitHub Actions, Docker, AWS EC2
- Backend:** Node.js, REST APIs, PostgreSQL, MongoDB, WebSockets, Auth (JWT, OAuth2)
- Frontend:** Next.js, React, HTML, CSS, Tailwind CSS

EDUCATION

High-School Diploma – Makkah Scientific Institute, Imam Mohammad ibn Saud UniversitySep 2019 - Jul 2022
